SENATIX WELLNESS ERP

Official User Walkthrough & Beginner Operating Manual

Version 2.0 | Medicine Distribution, Field Sales & Cloud Ledger

1. System overview and dual portals

Senatix Wellness ERP manages pharmaceutical distribution and sales. It separates complex back-office work from daily sales. The system has two distinct modes:

1. Head Office Portal: Used on desktop or laptop by the owner, managing director, accountant, and storekeeper to manage stock, factory orders, employee accounts, expenses, and payroll.
2. Field Sales Mobile App: A simplified mobile interface for sales officers (MPO) on the road. Officers check their in-hand stock, record instant deliveries to customers, and track daily cash collection.

2. Login accounts and access

Role	User ID	Default PIN	Access Area
Super Admin	ADM-01	1234	Full company access and settings
Managing Director	EXE-01	1234	Executive reports and financials
Store In-charge	STR-01	1234	Godown inventory, factory GRN, batch dates
Senior Accountant	ACC-01	1234	Ledger, expenses, payroll settlement
Field Officer (Mirpur)	EMP-001	1234	Field mobile app, in-hand stock, direct bills
Field Officer (Dhanmondi)	EMP-002	1234	Field mobile app, in-hand stock, direct bills
Delivery Staff	DEL-01	1234	Delivery dispatch, van stock handovers

3. Step by step daily operating instructions

Step 1: Receiving stock from factory (Godown Inward)

Go to Inventory > Stock Receipt. Choose the supplier, enter the factory challan number, batch number, and expiry date. Click Save. The medicines immediately enter central godown inventory.

Step 2: Issuing stock to sales officers (In-Hand Stock)

Go to Staff & Stock. Click Hand Over Stock. Choose the officer and select the medicine boxes. Handed-over boxes move from godown stock to that specific employee. If an employee keeps products without selling, the system tracks it as in-hand unsold stock.

Step 3: Creating instant sales invoices and delivery challans

Go to Make Bill. Select the employee who is selling, pick the medicines, enter any discount, and enter the cash received. Click Save & Print. The system automatically creates a professional PDF invoice and delivery challan.

Step 4: Field sales on mobile phones (For officers on duty)

Officers open the website on their phone, tap Field App, and log in with their ID (e.g. EMP-001). They can view unsold boxes in their bag, make bills on the spot, and record customer payments.

Confidential - For Internal Operating Use Only

Step 5: Handing over cash and returning unsold stock

When an officer returns to office, open Staff & Stock. Click Accept Cash to log money deposited into office cash. Click Return Stock to return unsold boxes back to central godown.

Confidential - For Internal Operating Use Only

4. Doctors, promotions and monthly payroll

Doctors directory and prescription tracking

Go to Doctors. Add doctors with their degrees, chamber address, and assigned sales officer. When sales officers visit with sample medicines or promotional gifts, log the item under Log Gift. Track monthly prescription counts per doctor.

Company expenses and true net profit

Go to Expenses. Record daily expenses such as warehouse rent, electricity, delivery van fuel, and office tea. The dashboard automatically subtracts factory cost (DP) and expenses from total sales (TP) to show true net profit.

Attendance and monthly salary generation

Go to Attendance & Payroll. Mark daily presence with one click to calculate daily TA/DA. At the end of the month, click Generate Monthly Payroll to produce salary slips with base salary, allowances, and deductions.

1-Click complete Excel backup (18 sheets)

Go to Reports & Backup. Click Download 18-Sheet Excel Backup. A comprehensive .xlsx file downloads immediately with full tables for inventory, sales, expenses, staff, and ledger.

5. Practical tips for non-technical owners

1. Always download the 18-sheet Excel backup once every week for your offline safety.

2. Keep your Supabase database credentials safe and never share your admin PIN with field staff.

3. Before issuing medicines to staff, make sure new factory batches have been saved under Stock Receipt.

4. On mobile devices, tap the language button at the bottom of the sidebar to switch between Bangla and English at any time.
